King Air 350

If ever an airplane could be said to have a “can do” attitude and an “eager to please” work ethic, this is the one. The King Air 350 offers the utmost in versatility and capability—making it the definitive “go anywhere, do anything” aircraft.

By combining high performance, luxury and advanced engineering with unparalleled distinction, the Beechcraft King Air 350 represents the perfect way to get from here to there ... while thoroughly enjoying the ride.

The King Air 350 is a "load and go" aircraft. Fill all eight seats in the luxurious double-club cabin. Fill the class leading heated, pressurized, and in-flight-accessible baggage area – the largest in its class. Then, fill the tanks with fuel (enough to fly nearly 1,500-statue miles) and you are ready to take on anything, for business or pleasure **flight restrictions do apply based on passenger count and flight itinerary* .

The King Air 350 is capable of handling almost any mission, combining comfort, speed, performance, mission flexibility and economy. The double club seating arrangement allows for multiple group or individual work environments. Other amenities include luxurious leather seating, individual reading lights and air vents, expansive view windows, polarized window shades and sturdy retractable worktables.

King Air 350

From the minute you step into the cabin, you will know why it is called the "king" of all turboprops. The cabin is a true masterpiece in comfort, convenience and design.

Built around Beechcraft's legendary, squared-oval cabin cross section, the Beechcraft King Air 350's interior is incredibly spacious.

A vertical squared-oval cabin design maximizes head and shoulder area, contributing to the overall feeling of openness in the interior. The double-club seating arrangement allows ample room for multiple group or individual work.

With a built-in refreshment center, private aft lavatory, cabin-accessible luggage area and glove-soft leather seating, it is the ideal place to work, think or relax. Just because business travel has become a necessity does not mean it cannot be enjoyable and comfortable.
